Administrative Stuff

- Install a JDK, Eclipse
- Start writing code
- Lab 1 due this week
- Lab 2
- Reading: ch. 1-3
Last Time

- More on static methods
- Data types. `int double char boolean String`
- Expressions. Most review. Don’t forget
  - Order of operations (esp L→R when same level)
  - Integer arithmetic. 5/2, 5/2.0
  - modulo `%`
    - a % b remainder when you divide a by b
    - Why?
    - What happens when a < b? b = 0?
- String concatenation
  - 1 + 0 + 0 + "word"
  - "word" + 1 + 0 + 0
- Variables. Must declare first.
  - type name;
  - type name = initialValue;
- Operators
  - logical < > <= >= ==
  - arithmetic += -= *=***
