

```
1: public class PointMain {  
2:     public static void main(String args[]) {  
3:         Point p = new Point(10,20);  
4:  
5:         /* pain to have to type all this just to  
6:          * print out the x and y coordinates */  
7:         System.out.println("p.x=" + p.x + ", p.y=" + p.y);  
8:  
9:         /* - println expects String ref  
10:            * - it finds a Point ref  
11:            * - calls Point's toString() */  
12:         System.out.println(p.toString());  
13:         System.out.println(p);  
14:     }  
15: }
```
