```java
public class WhatsPrinted {
  public static void main(String []args) {
    String verb = "enlarge";
    String person = "Yankee";
    String bev = "Large coffee";
    String personality = "scofflaw";

    String mixer = verb.toUpperCase().charAt(2) +
      verb.substring(3) + " " +
      personality.substring(1, 5) +
      person.substring(4);

    if (mixer == bev) {
      System.out.println("same");
    } else {
      System.out.println("different");
    }
  }
}
```
