

`int [][] A = new int[#rows][#cols]`

`int [][] A = new int [2][3]`

`int getNumRows(int [][] A)`

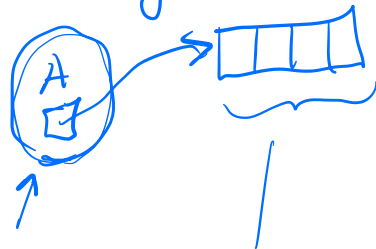

`int getNumCols(int [][] A)`

Recall:

`int [] A = new int [4];`

ref to array

array

A.length

for (i=0; i < A.length; i++)  
 for (j=0; j < length of row; j++)
