

ObjectsAndMethods.java

```
1: public class ObjectsAndMethods {  
2:     public static void func(Point p) {  
3:         p.x++;  
4:         System.out.println("during: p.x=" + p.x + ", p.y=" + p.y);  
5:         System.out.println("p = " + p);  
6:     }  
7:  
8:     public static void main(String args[]) {  
9:         Point p = new Point();  
10:          
11:        p.x = 10;  
12:        p.y = 20;  
13:          
14:        System.out.println("before: p.x=" + p.x + ", p.y=" + p.y);  
15:        func(p);  
16:        System.out.println("p = " + p);  
17:        System.out.println("after: p.x=" + p.x + ", p.y=" + p.y);  
18:    }  
19: }
```

whats p.x here?
