

```
public class WhatsPrinted2 {
    public static void whatHappens(int A[]) {
        int []B = new int[A.length];

        for (int i=0; i<A.length; i++) {
            B[i]=A[i]*2;
        }
        A=B;
    }

    public static void main(String args[]) {
        int A[] = {10,20,30};
        whatHappens(A);
        System.out.println(A[0]);
    }
}
```
