

Crowdsensing and Task Allocation

- [1] Online Task Assignment for Crowdsensing in Predictable Mobile Social Networks
- [2] Multi-Task Assignment for CrowdSensing in Mobile Social Networks
- [3] Online Stable Task Assignment in Opportunistic Mobile Crowdsensing With Uncertain Trajectories
- [4] Crowdlet: Optimal Worker Recruitment for Self-Organized Mobile Crowdsourcing
- [5] Reliability-Aware and Deadline-Constrained Mobile Service Composition Over Opportunistic Networks
- [6] Crowd Foraging: A QoS-Oriented Self-Organized Mobile Crowdsourcing Framework Over Opportunistic Networks
- [7] Optimal Task Partition with Delay Requirement in Mobile Crowdsourcing
- [8] Towards Cost-Effective and Budget-Balanced Task Allocation in Crowdsourcing Systems
- [9] Preference and Mobility-Aware Task Assignment in Participatory Sensing
- [10] Incentives-Based Preferences and Mobility-Aware Task Assignment in Participatory Sensing Systems
- [11] Task Replica Assignment in Mobile Self-Organized Crowdsensing
- [12] Multi-Layer-Based Opportunistic Data Collection in Mobile Crowdsourcing Networks
- [13] Towards Efficient Mobile Crowdsensing Assignment and Uploading Schemes
- [14] Optimal Sensing Task Distribution Algorithm for Mobile Sensor Networks With Agent Cooperation Relationship
- [15] Fine-Grained Task Distribution for Mobile Sensor Networks with Agent Cooperation Relationship
- [16] Stable Worker–Task Assignment in Mobile Crowdsensing Applications
