

## **Surveys and Frameworks**

- [1] Vehicular Social Networks: A Survey
- [2] Routing Protocols in Vehicular Delay Tolerant Networks: A Comprehensive Survey
- [3] A Survey of Social-Aware Routing Protocols in Delay Tolerant Networks: Applications, Taxonomy and Design-Related Issues
- [4] A Survey of Mobile Social Networks: Applications, Social Characteristics, and Challenges
- [5] Data Routing Strategies in Opportunistic Mobile Social Networks: Taxonomy and Open Challenges
- [6] Opportunistic Mobile Social Networks [Book]
- [7] Opportunistic Mobile Social Networks: Challenges Survey and Application in Smart Campus
- [8] Integrating Social Links into Wireless Networks: Modeling, Routing, Analysis, and Evaluation
- [9] Friendships in the Air: Integrating Social Links into Wireless Network Modeling, Routing, and Analysis
- [10] Routing in User-Centric Networks
- [11] Systems Applications of Social Networks
- [12] Exploiting Social Information in Opportunistic Mobile Communication
- [13] High Efficient Routing and Balanced Association Technology of Mobile Networks
- [14] Survey on Crowd Sourced E-Health Networks
- [15] Information Dissemination in Social-Featured Opportunistic Networks
- [16] Analysis of Social Network Algorithms in Delay Tolerant Networks
- [17] An Overview of Routing Protocols in Mobile Social Contact Networks
- [18] Social-Based Routing Protocols in Opportunistic Networks
- [19] Social-Based Data Routing Strategies in Delay Tolerant Networks
- [20] Survey on Crowd Sourced E-Health Networks

[21] Systems Applications of Social Networks

[22] Routing in Delay Tolerant Networks (DTNs)
