CIS 4350: Wireless Networks and Security

Spring 2011

Instructor: Dr. James Du

Email: dux@temple.edu        Phone: 1-8888         Office: 1037 Wachman

Lectures: 2:00-3:20pm, Tuesday and Thursday        Location: Tuttleman 0305A

Laboratory: 8:30-10:20, Tuesday, in CC 209.

Dr. Du Office Hours: 3:30-4:30pm Thursday.
TA: MOUSSA TAIFI, tub51722@temple.edu, office hours: 4-5pm, MW, 1015E Wachman

Prerequisite: CIS 3207 (OS) or with Instructor's permission            Credits: 4

Educational Objectives: This course introduces essential wireless networks and security issues.

Topics:
1. Introduction
2. Symmetric Encryption and Message Confidentiality
3. Public Key Cryptography
4. Wireless Local Area Networks
5. Wireless Cellular Networks
6. Mobile Ad hoc Networks
7. Wireless Sensor Networks
8. 4G Wireless Networks

Technical Paper Reading & Presentation

Each student is required to read a recent research paper in the areas of wireless networks and security. The papers are from recent top wireless/security conferences (such as ACM WiSec, IEEE Infocom, ACM MobiCom, and ACM MobiHoc) and journals. The paper list will be given to students for selections. The purpose of the Technical Paper Reading is to let students know the up-to-date research frontier in networking area. Each student needs to prepare a presentation and talk about the main content of the technical paper.

Course Policy

- Students are expected to attend all classes. If a class is missed for any reason, the student is responsible for finding out the material covered, any assignment and handouts given, and any other announcements made in the class (e.g., exam date).

- Homework and other assignments should be submitted at the beginning of the class on the corresponding due date. Late work will be penalized at 5% of its full credit per day. You may discuss homework assignments with classmates but all solutions must be original and individually prepared.

- No make-up exam will be allowed except in cases of emergencies for which prior permission of the instructor must be taken.

- Cheating in an exam or an assignment (project, homework) can result in a grade of F in the course.
